GOVERNMENT PUBLICATIONS SALE OFFICE,
G.P.O. ARCADE, DUBLIN

CONTENTS

MARCH QUARTER 1965

	PAGE
Text	3
Table I. Marriages, Births, Deaths and Infant Mortality	4
„ II. Deaths from Principal Causes	5
„ III. Deaths registered, classified by Cause and Age Group	6
„ IV. Deaths classified by Cause and by County of Residence of Deceased	8
„ V. Births classified by County of Occurrence and by Residence of Mother. Marriages classified by County in which registered. Birth and Marriage Rates	10
„ VI. Deaths classified by County of Occurrence and County of Residence of Deceased. Death, Infant Mortality and Neo-natal Mortality Rates for each County	11
„ VII. Births and Deaths assigned to the Principal Towns (other than the County Boroughs and Dun Laoghaire Borough)	12
„ VIII. Summary of cases of Infectious Diseases notified to the Department of Health	13

NOTE.- The figures in this report for 1964 and 1965 are provisional, while those relating to 1963 and earlier years are definitive. The numbers of births and deaths are exclusive of late registrations, i.e., births and deaths registered on the authority of An tArd-Chlaraitheoir. Births, deaths and marriages are registered in the county or county borough in which they occur. In the case of births and deaths, assigned figures, i.e., those relating to residents of each area, are also shown.

MARCH QUARTER, 1965

MARRIAGES

The number of marriages returned during the quarter was 3,446 equivalent to an annual rate of 4.8 per 1,000 population; this rate is 1.4 above that for the corresponding quarter of 1964.

Of the total marriages 3,353 were celebrated in accordance with the rites and ceremonies of the Catholic Church, being equivalent to a rate of 5.0 per 1,000 of Catholics in the population. The remainder, 93 is equivalent to a rate of 2.5 per 1,000 of the population other than Catholic.

The number of marriages registered in each county and county borough in the quarter is shown in Table V.

BIRTHS

The number of births registered during the quarter was 15,185, of which 7,791 were those of males and 7,394 were those of females. This number represents a rate of 21.3 per 1,000 of the population per annum, being 0.1 above that for the first quarter of 1964.

The total includes 318 illegitimate births, equivalent to 2.1 per cent of all births registered.

The number of births registered in each county and county borough, and also births assigned according to the area of normal residence of the mother, are shown in Table V.

DEATHS

The number of deaths registered during the quarter was 9,278, of which 5,037 were those of males and 4,241 were those of females. The equivalent annual rate was 13.0 per 1,000 population, being 0.5 above the rate for the first quarter of 1964.

Deaths classified according to cause, sex and age group are shown in Table III, and according to cause and area of residence in Table IV. The number of deaths registered in each area is shown in Table VI.

Tuberculosis. Deaths from this disease numbered 95, including 91 from tuberculosis of the respiratory system and 4 from other forms of tuberculosis. Corresponding figures for the first quarter of 1964 were, 125, 119 and 6 respectively. For rates see Table II.

Other Infectious Diseases. There was one death from each of the diseases, diphtheria, measles and meningococcal infections registered during the quarter. Under the heading of other infective and parasitic diseases in Table III are 9 deaths from septicaemia, 7 from infectious hepatitis and one each from tetanus and leptospirosis.

Malignant Neoplasms. Deaths under this heading numbered 1,245, being equivalent to a rate of 1.7 per 1,000 population. Of these 570 or 46 per cent were due to malignant neoplasms of the digestive system.

Diseases of Circulatory System. Deaths under this heading numbered 3,517, being equivalent to a rate of 4.9 per 1,000 population. Of these, coronary and arteriosclerotic heart disease accounted for 1,482 or 42 per cent, while 918 or 26 per cent were due to other myocardial degeneration.

Diseases of Respiratory System. Deaths from influenza numbered 55, pneumonia accounted for 457 deaths, while the remaining respiratory diseases caused 625 deaths; corresponding figures for the first quarter of 1964 were 80, 383 and 570 respectively.

Maternal Mortality. There were 3 deaths due to complications of pregnancy and childbirth, equivalent to a rate of 0.2 per 1,000 births registered. The rate for the first quarter of 1964 was 0.4.

Infant Mortality. There were 377 deaths of infants under one year of age and 259 of these occurred at ages under 4 weeks. The infant mortality rate was 25 per 1,000 births registered and the neo-natal rate was 17. The rates for the corresponding quarter of 1964 were 29 and 20. The rates for counties are shown in Table VI.

Population. The estimated population in April, 1964 was 2,849,000.

Table I.—MARRIAGES, BIRTHS and DEATHS registered in the years 1960 to 1965, by Quarters.

Table I. Marriages, Births, Deaths and Infant Mortality	20
„ II. Deaths from Principal Causes	21
„ III. Deaths registered, classified by Cause and Age Group	22
„ IV. Deaths classified by Cause and by County of Residence of Deceased	24
„ V. Births classified by County of Occurrence and by Residence of Mother. Marriages classified by County in which registered. Birth and Marriage Rates	26
„ VI. Deaths classified by County of Occurrence and County of Residence of Deceased. Death, Infant Mortality and Neo-natal Mortality Rates for each County	27
„ VII. Births and Deaths assigned to the Principal Towns (other than the County Boroughs and Dun Laoghaire Borough)	28
„ VIII. Summary of cases of Infectious Diseases notified to the Department of Health	29

NOTE.- The figures in this report for 1964 and 1965 are provisional, while those relating to 1963 and earlier years are definitive. The numbers of births and deaths are exclusive of late registrations, i.e., births and deaths registered on the authority of An tArd-Chlaraitheoir. Births, deaths and marriages are registered in the county or county borough in which they occur. In the case of births and deaths, assigned figures, i.e., those relating to residents of each area, are also shown.

JUNE QUARTER, 1965.

MARRIAGES

The number of marriages returned during the quarter was 3,489 equivalent to an annual rate of 4.9 per 1,000 population; this rate is 0.8 below that for the corresponding quarter of 1964.

Of the total marriages 3,360 were celebrated in accordance with the rites and ceremonies of the Catholic Church, being equivalent to a rate of 5.0 per 1,000 of Catholics in the population. The remainder, 129 is equivalent to a rate of 3.5 per 1,000 of the population other than Catholic.

The number of marriages registered in each county and county borough in the quarter is shown in Table V.

BIRTHS

The number of births registered during the quarter was 16,388, of which 8,299 were those of males and 8,089 were those of females. This number represents a rate of 23.0 per 1,000 of the population per annum, being 1.4 below that for the second quarter of 1964.

The total includes 392 illegitimate births, equivalent to 2.4 per cent of all births registered.

The number of births registered in each county and county borough, and also births assigned according to the area of normal residence of the mother, are shown in Table V.

DEATHS

The number of deaths registered during the quarter was 8,161, of which 4,473 were those of males and 3,688 were those of females. The equivalent annual rate was 11.4 per 1,000 population, being 1.3 below the rate for the second quarter of 1964.

Deaths classified according to cause, sex and age group are shown in Table III, and according to cause and area of residence in Table IV. The number of deaths registered in each area is shown in Table VI.

Tuberculosis.- Deaths from this disease numbered 81, including 75 from tuberculosis of the respiratory system and 6 from other forms of tuberculosis. Corresponding figures for the second quarter of 1964 were, 95, 85 and 10 respectively. For rates see Table II.

Other Infectious Diseases.- There were three deaths each from whooping cough and measles and one each from meningococcal infections and dysentery registered during the quarter. Under the heading of other infective and parasitic diseases in Table III are 4 deaths from septicaemia, one from infectious hepatitis and one from tetanus.

Malignant Neoplasms.-Deaths under this heading numbered 1,192, being equivalent to a rate of 1.7 per 1,000 population. Of these 535 or 45 per cent were due to malignant neoplasms of the digestive system.

Diseases of Circulatory System.- Deaths under this heading numbered 3,135, being equivalent to a rate of 4.4 per 1,000 population. Of these, coronary and arteriosclerotic heart disease accounted for 1,300 or 41 per cent, while 788 or 25 per cent were due to other myocardial degeneration.

Diseases of Respiratory System.- Deaths from influenza numbered 41, pneumonia accounted for 355 deaths, while the remaining respiratory diseases caused 474 deaths; corresponding figures for the second quarter of 1964 were 196, 387 and 559 respectively.

Maternal Mortality.- There were 10 deaths due to complications of pregnancy and childbirth, equivalent to a rate of 0.6 per 1,000 births registered. The rate for the second quarter of 1964 was 0.4.

Infant Mortality.- There were 448 deaths of infants under one year of age and 305 of these occurred at ages under 4 weeks. The infant mortality rate was 27 per 1,000 births registered and the neo-natal rate was 19. The rates for the corresponding quarter of 1964 were 26 and 17. The rates for counties are shown in Table VI.

Population.- The estimated population in April, 1965 was 2,855,000.

Table III.—Deaths registered during the Quarter ended 30th June, 1965, classified by Cause and Age Group.

Table I. Marriages, Births, Deaths and Infant Mortality	36
„ II. Deaths from Principal Causes	37
„ III. Deaths registered, classified by Cause and Age Group	38
„ IV. Deaths classified by Cause and by County of Residence of Deceased	40
„ V. Births classified by County of Occurrence and by Residence of Mother. Marriages classified by County in which registered. Birth and Marriage Rates	42
„ VI. Deaths classified by County of Occurrence and County of Residence of Deceased. Death, Infant Mortality and Neo-natal Mortality Rates for each County	43
„ VII. Births and Deaths assigned to the Principal Towns (other than the County Boroughs and Dun Laoghaire Borough)	44
„ VIII. Summary of cases of Infectious Diseases notified to the Department of Health	45

NOTE—The figures in this report for 1964 and 1965 are provisional, while those relating to 1963 and earlier years are definitive. The numbers of births and deaths are exclusive of late registrations, i.e., births and deaths registered on the authority of An tArd-Chlaraitheoir. Births, deaths and marriages are registered in the county or county borough in which they occur. In the case of births and deaths, assigned figures, i.e., those relating to residents of each area, are also shown.

SEPTEMBER QUARTER, 1965

MARRIAGES

The number of marriages returned during the quarter was 6,274 equivalent to an annual rate of 8.8 per 1,000 population: 0.3 above that for the corresponding quarter of 1964.

Of the total marriages 6,053 were celebrated in accordance with the rites and ceremonies of the Catholic Church, being equivalent to a rate of 8.9 per 1,000 of Catholics in the population. The remainder, 221, is equivalent to a rate of 6.0 per 1,000 of the population other than Catholic.

The number of marriages registered in each county and county borough in the quarter is shown in Table V.

BIRTHS

The number of births registered during the quarter was 17,393, of which 8,945 were those of males and 8,448 were those of females. This number represents a rate of 24.4 per 1,000 of the population per annum, being 1.2 above that for the third quarter of 1964.

The total includes 401 illegitimate births, equivalent to 2.3 per cent of all births registered.

The number of births registered in each county and county borough, and also births assigned according to the area of normal residence of the mother, are shown in Table V.

DEATHS

The number of deaths registered during the quarter was 7,326, of which, 3,973 were those of males and 3,353 were those of females. The equivalent annual rate was 10.3 per 1,000 population, being 0.6 above the rate for the third quarter of 1964.

Deaths classified according to cause, sex and age group are shown in Table III, and according to cause and area of residence in Table IV. The number of deaths registered in each area is shown in Table VI.

Tuberculosis.—Deaths from this disease numbered 63, including 53 from tuberculosis of the respiratory system and 10 from other forms of tuberculosis. Corresponding figures for the third quarter of 1964 were, 77, 70 and 7 respectively. For rates see Table II.

Other Infectious Diseases.—There were 3 deaths from measles, 3 from infectious hepatitis, 2 from tetanus, one each from whooping cough, leptospirosis, rubella and late effects of poliomyelitis and 4 from septicaemia.

Malignant Neoplasms.—Deaths under this heading numbered 1,249, being equivalent to a rate of 1.7 per 1,000 population. Of these, 553 or 44 per cent. were due to malignant neoplasms of the digestive system.

Diseases of Circulatory System.—Deaths under this heading numbered 2,778 being equivalent to a rate of 3.9 per 1,000 population. Of these coronary and arteriosclerotic heart disease accounted for 1,273 or 46 per cent. while 660 or 24 per cent. were due to other myocardial degeneration.

Diseases of Respiratory System.—Deaths from influenza numbered 18, pneumonia accounted for 228 deaths, while the remaining respiratory diseases caused 310 deaths; corresponding figures for the third quarter of 1964 were 23, 201 and 255 respectively.

Maternal Mortality.—There were 3 deaths due to complications of pregnancy and childbirth, equivalent to a rate of 0.2 per 1,000 births registered. The rate for the third quarter of 1964 was 0.5.

Infant Mortality.—There were 395 deaths of infants under one year of age and 275 of these occurred at ages under 4 weeks. The infant mortality rate was 23 per 1,000 births registered and the neo-natal rate was 16. The rates for the corresponding quarter of 1964 were 25 and 17. The rates for counties are shown in Table VI.

Population.—The estimated population in April, 1965 was 2,855,000

„ 5 Births and Deaths assigned to the Principal Towns (other than the County Boroughs and Dun Laoghaire Borough)	74
„ 6 Summary of cases of Infectious Diseases notified to the Department of Health	75

NOTE—The figures in this report for 1964 and 1965 are provisional, while those relating to 1963 and earlier years are definitive. The numbers of births and deaths are exclusive of late registrations, i.e., births and deaths registered on the authority of an *tArd-Chlaraitheoir*. Births, deaths and marriages are registered in the county or county borough in which they occur. In the case of births and deaths assigned figures, i.e., those relating to residents of each area, are also shown.

DECEMBER QUARTER, 1965

MARRIAGES

The number of marriages returned during the quarter was 3,455 equivalent to an annual rate of 4.8 per 1,000 population; the same as that for the corresponding quarter of 1964.

Of the total marriages 3,348 were celebrated in accordance with the rites and ceremonies of the Catholic Church, being equivalent to a rate of 4.9 per 1,000 of Catholics in the population. The remainder, 107, is equivalent to a rate of 2.9 per 1,000 of the population other than Catholic.

The number of marriages registered in each county and county borough in the quarter is shown in Table V.

BIRTHS

The number of births registered during the quarter was 14,477, of which 7,370 were those of males and 7,107 were those of females. This number represents a rate of 20.3 per 1,000 of the population per annum, being 0.9 below that for the fourth quarter of 1964.

The total includes 278 illegitimate births, equivalent to 1.9 per cent of all births registered.

The number of births registered in each county and county borough, and also births assigned according to the area of normal residence of the mother, are shown in Table V.

DEATHS

The number of deaths registered during the quarter was 8,013, of which 4,342 were those of males and 3,671 were those of females. The equivalent annual rate was 11.2 per 1,000 population, being 0.4 above the rate for the fourth quarter of 1964.

Deaths classified according to cause, sex and age group are shown in Table III, and according to cause and area of residence in Table IV. The number of deaths registered in each area is shown in Table VI.

Tuberculosis.—Deaths from this disease numbered 93, including 81 from tuberculosis of the respiratory system and 12 from other forms of tuberculosis. Corresponding figures for the fourth quarter of 1964 were 102, 92 and 10 respectively. For rates see Table II.

Other Infectious Diseases.—There were 7 deaths from infectious hepatitis, 3 from herpes zoster, one each from acute infectious encephalitis, late effects of poliomyelitis and measles and 2 from septicaemia.

Malignant Neoplasms.—Deaths under this heading numbered 1,267, being equivalent to a rate of 1.8 per 1,000 population. Of these, 563 or 44 per cent, were due to malignant neoplasms of the digestive system.

Diseases of Circulatory System.—Deaths under this heading numbered 3,132, being equivalent to a rate of 4.4 per 1,000 population. Of these, coronary and arteriosclerotic heart disease accounted for 1,448 or 46 per cent, while 733 or 23 per cent were due to other myocardial degeneration.

Diseases of Respiratory System.—Deaths from influenza numbered 18, pneumonia accounted for 347 deaths, while the remaining respiratory diseases caused 419 deaths; corresponding figures for the fourth quarter of 1964 were 17, 305 and 409 respectively.

Maternal Mortality.—There was one death due to complications of pregnancy and childbirth, equivalent to a rate of 0.1 per 1,000 births registered. The rate for the fourth quarter of 1964 was 0.4

Infant Mortality.—There were 382 deaths of infants under one year of age and 257 of these occurred at ages under 4 weeks. The infant mortality rate was 26 per 1,000 births registered and the neo-natal rate was 18. The rates for the corresponding quarter of 1964 were 27 and 18. The rates for counties are shown in Table VI.

Population.—The estimated population in April, 1965 was 2,855,000.

Table I.—MARRIAGES, BIRTHS and DEATHS registered in the years 1960 to 1965, by Quarters.

Coronary and arteriosclerotic heart disease																																	
Other myocardial degeneration																																	
Other diseases of heart																																	
Hypertension with heart disease																																	
Hypertension without mention of heart																																	
Other diseases of circulatory system																																	
Influenza																																	
Pneumonia																																	
Bronchitis																																	
Bronchiectasis																																	
Other diseases of respiratory system																																	
Ulcer of stomach and duodenum																																	
Appendicitis																																	
Intestinal obstruction and hernia																																	
Gastritis and enteritis (except of newborn)†																																	
Cirrhosis of liver																																	
Other diseases of digestive system																																	
Nephritis and nephrosis																																	
Hyperplasia of prostate																																	
Complications of pregnancy and childbirth																																	
Congenital malformations																																	
Birth injuries, asphyxia and atelectasis																																	
Infections of the newborn†																																	
Other diseases of early infancy																																	
Senility without psychosis																																	
Ill-defined and unknown causes																																	
All other diseases																																	
EXTERNAL CAUSES :																																	
Motor vehicle accidents																																	
All other accidents																																	
Suicide and self-inflicted injury																																	
Homicide and operations of war

Yearly Summary
1965

YEAR 1965

MARRIAGES

The number of marriages returned during the year was 16,664 equivalent to an annual rate of 5.8 per thousand of the population; this rate is 0.2 above that for 1964. Of the total marriages 16,114 (or 5.9 per thousand of the estimated number of Catholics in the population) were celebrated in accordance with the rites and ceremonies of the Catholic Church. The remainder (550) is equivalent to 3.7 per thousand of the population other than Catholic.

BIRTHS

The number of births registered during the year was 63,443, compared with 64,008 for 1964. The number of boys was 32,405 and the number of girls was 31,038, the proportion being 1,044 boys to 1,000 girls.

The annual birth rate was 22.2 per thousand population, and was 0.3 below the rate for 1964.

There were 1,389 illegitimate births in 1965, equivalent to 2.2 per cent of all births. The corresponding figure in 1964 was 1,280 illegitimate births or 2.0 per cent of the total births.

DEATHS

The number of deaths registered in 1965 was 32,778 which is 305 more than in the preceding year. The number of deaths of males was 17,825 and the number of female deaths was 14,953.

The annual death rate in 1965 was 11.5 per thousand population, being 0.1 above that for 1964.

Tuberculosis

Deaths from this disease in 1965 numbered 332 (300 from tuberculosis of the respiratory system and 32 from all other forms). Corresponding figures for 1964 were 399, 366 and 33 respectively. The death rate from all forms of tuberculosis in 1965 was 0.12 per 1,000 population.

Other Infectious Diseases

There were 2 deaths from late effects of poliomyelitis, 8 from measles, 4 from whooping cough and one each from infectious encephalitis, dysentery and diphtheria registered during 1965.

Malignant Neoplasms

Deaths under this heading numbered 4,953, being equivalent to a rate of 1.73 per 1,000 population. Of these, 2,221 or 45 per cent were due to malignant neoplasms of the digestive system.

Diseases of Circulatory System

Deaths under this heading numbered 12,562, being equivalent to a rate of 4.4 per 1,000 population. Of these, coronary and arteriosclerotic heart disease accounted for 5,503 or 44 per cent, while 3,099 or 25 per cent were due to other myocardial degeneration.

Diseases of Respiratory System

Deaths from influenza numbered 132, pneumonia accounted for 1,387 deaths, while the remaining respiratory diseases caused 1,828 deaths; corresponding figures for the year 1964 were 316, 1,276 and 1,793 respectively.

Maternal Mortality

There were 17 deaths due to complications of pregnancy and childbirth, equivalent to a rate of 0.27 per 1,000 births registered. The corresponding rate for 1964 was 0.44.

Infant Mortality

There were 1,602 deaths of infants under one year of age and 1,095 of these occurred at ages under 4 weeks. The infant mortality rate was 25 per 1,000 births registered and the neonatal rate was 17. The rates for counties are shown in Table 4.

Population

The estimated population in April 1965 was 2,855,000.

Table I.—Deaths Registered during the year 1965 classified by cause and age group.
